EDUCATION

International Institute of Information Technology, Bangalore (IIITB)

July 2023 - July 2028

BTech + MTech (Dual Degree) in Computer Science (6 semesters out of 10)

EXPERIENCE

OpenG2P

May 2026 - Present

Machine Learning Engineer

- Manual SQL triage across fragmented systems is slow and hard to scale for operational investigations.
- Built an LLM-assisted pipeline that converts natural-language requests into schema-constrained SQL, applies deterministic validation/retry checks, and links records across data sources.
- Enabled cross-database analysis across 4 systems and **achieved 95% linkage quality** on real runs (74/78 linked rows), improving consistency of investigation outputs.

PROJECTS

AutoDocLM | Python, Ollama, OpenAI SDK, ChromaDB, NetworkX, MkDocs [🔗 \[code\]](#)

Mar 2026 - Apr 2026

- Building an automated system that generates structured documentation from GitHub repositories.
- Implemented repository parsing, dependency graph extraction, and semantic code retrieval using local LLMs and FAISS.
- Automatically generates documentation for 4+ modules including architecture overview, setup guides, and diagrams via MkDocs.

Hospital Site Suitability Analysis | QGIS, OpenRouteService, WorldPop, OSM [🔗 \[code\]](#)

Oct 2025 - Nov 2025

- Performed GIS-based spatial analysis to identify optimal hospital locations in Hyderabad.
- Integrated OpenStreetMap roads, WorldPop population data, and OpenRouteService travel-time routing.
- Identified **Top 5% underserved zones** with high population density and high average hospital access time.

Signal Cluster Classification | Sklearn, Python, Jupyter Notebook [🔗 \[code\]](#)

Sept 2025 - Oct 2025

- Built a multiclass classifier to predict signal cluster categories from synthetic 2D signal data.
- Performed feature exploration, preprocessing, and model training using Scikit-learn.
- Achieved a **Macro F1 Score of 0.989** on a 3-class signal cluster classification task.

TECHNICAL SKILLS

- Programming Languages:** Python, C/C++, Go, Rust, JS/TS, Java, HTML/CSS, PostgreSQL
- Libraries & Frameworks:** PyTorch, NumPy, Hugging Face, React, Spring Boot, Node.js, Tailwind, Matplotlib, ROS 2
- Tools & Platforms:** MongoDB, Docker, AWS, Kubernetes, Jenkins, Anaconda, Jupyter Notebook, Android Studio, Linux

ACHIEVEMENTS

Reliance Undergraduate Scholarship

2023 - 2028

- Awarded for consistent dedication to learning and active engagement in my academic pursuits.

Infin8 Sponsorship Team

2024

- Contributed as the Sponsorship Coordinator for the annual cultural festival Infin8 and secured sponsorships for the event
